## Certification Requirements

### Certification Requirements for the ACC RiverSafe® Providers' Staff

Staff assigned to ACC RiverSafe® programmes must have qualifications that meet the requirements of the ACC RiverSafe® Programme Certification List.

If the qualification(s) detailed by the provider are on The ACC RiverSafe® Programme Certification List then the client can be satisfied that the provider meets WSNZ's certification requirements for delivering ACC RiverSafe®. Providers may be asked to provide documentary evidence that leaders hold these qualifications.

To ensure that ACC RiverSafe® leaders' skills are current, the client will also be required to ask the provider for an assurance that each leader assigned to the programme has led groups in relevant river situations within the last two years.

Experience, logged or otherwise, does not meet WSNZ certification requirements for The ACC RiverSafe® Programme. This is because clients are not necessarily in a position to judge the quality or relevance of the experience to their needs. It should be noted however that The ACC RiverSafe® Programme certification requirements are not excessive and would be obtainable cheaply and quickly for an experienced person.

No qualifications on The ACC RiverSafe® Programme Certification list are maintained or administered by WSNZ.
